To Whom It May Concern,

It is my pleasure to recommend Mr. Shiv Singh for the position of software developer or computer programmer within your organization.

I have had the good fortune to know Mr. Singh through his work on the Perl computer language compiler, of which I am the project lead.

Mr. Singh applied to my project with a request for me to serve as his official mentor on this highly technical work.

I provided Mr. Singh with a “Pull Request Challenge”, which requires a prospective student to complete a certain set of programming tasks before being accepted onto a software development team. You can see details of this Challenge at the following link:

<https://github.com/wbraswell/rperl/issues/96>

Mr. Singh not only successfully completed his own Challenge, he then went above and beyond the call of duty and completed a second Challenge which had been abandoned by another student!

<https://github.com/wbraswell/rperl/issues/98>

I have personally approved Mr. Singh's completion of his Pull Request Challenge, and I have made him an official member of the Perl compiler development team.

Where others have failed, Mr. Singh has succeeded.

Please do not hesitate to contact me if you have any questions.

Yours,  
~ William N. Braswell, Jr.

A handwritten signature in blue ink, appearing to read 'WBJr', is written below the typed name.
